

INTERVIEW KIT VT506Mobile

PROFESSIONAL INTERVIEW KIT WITH TWO VT506MOBILE AS MATCHED PAIR

The Interview Kit VT506Mobile is a broadcast quality bundle for mobile speech recording. The VT506Mobile, produced in Switzerland, is characterised by its outstanding sonic qualities. A small emphasis at 10 kHz optimises intelligibility even when the microphone is worn underneath clothes. The Interview Kit bundles two of these microphones as a matched pair with a measured variance of 1dB or below, with an adapter for recording two people at the same time at identical levels on one smartphone. Mobile journalists, podcasters and Youtubers get the chance to record interviews and segments with multiple speakers in broadcast quality with little effort.

Plug-and-play functionality makes the Interview Kit VT506Mobile directly available in all of the important recording apps (allowing an external microphone), eradicating the need for extensive editing in postproduction. Ideal for the production of professional speech recording (Interviews, Videos in Talking Head-Format and more).

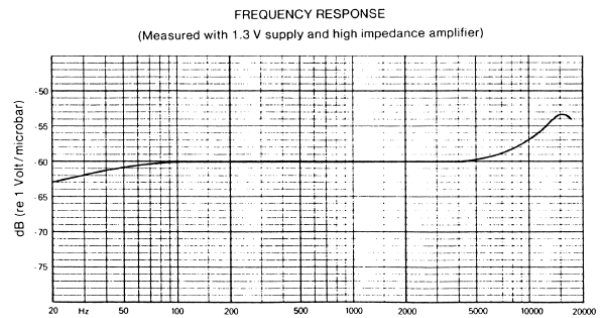

Colors: black

Application areas: For MoJo (Mobile Journalism) and Content Creators, Podcasts, Social Media-Videos (Youtube, Vimeo) Video in Talking-Head-Format
