

VT600D EARPHONE WITH DETACHABLE TUBE

Discreet, easy to use and hygienic.

The VT600D earphone features outstanding sound and wearing comfort for TV hosts and security guards. The sound tube just clicks to the driver, enabling easy change of the whole spiral tube including the earpiece – preserving hygiene even when multiple people work with the same receiver. The users merely connect their spiral tubes to the receiver and are ready to go.

The discreet design of the VT600D draws no attention, making the earphone ideal for live TV. With its flexible cable and the soft, elastic silicone earpiece, the VT600D is comfortable to wear. Its shape does not block the ear canal. For a perfect fit, four sizes are available for both left or right ear (S, M, L, XL).

The VT600D employs a standard 3.5 mm jack connector, making it compatible with virtually every wireless or wired monitoring receiver. It comes with a sturdy, water resistant VT box with attachment clip.
